PROJECTS

Blog web application

2023 - 2024

This blog web application, built using Python Flask and SQLite, showcases core web development skills by providing user authentication, blog management, and dynamic content handling. Users can sign up, log in, and create, view, and delete their blog posts.

Online shopping cart

2023 - 2023

Online shopping cart allows users to easily manage purchases with features to add, remove, or update items effortlessly. It provides real-time updates for cart totals and shipping costs, along with detailed product information. Built with C#, ASP.NET MVC, and SQL Server, the front end utilizes HTML, CSS, JavaScript, and Bootstrap for a responsive design. This combination ensures a seamless and efficient shopping experience.
